

On June 19<sup>th</sup> 2012 JAG Mobile Solutions was once again the major corporate sponsor for the charity Pro-Am Invitational in Angola Indiana held at the immaculate Glendarin Hills Golf Club. Marking the ninth annual event, the outing recorded record numbers for participation and fun.

The Pro-Am event pairs amateur golfers with golfing professionals from the women's US Open Futures Tour, or the LPGA. Over the past three years a variety of JAG Mobile Solutions customers have participated in golf, round table discussions and related activities.

During a pre event showcase JAG Mobile Solutions displayed their innovative 10-Station Lowering ADA Restroom Trailer. The 28' laminated fiberglass trailer's unique design characteristics lower the entire trailer to the ground while still having the ability to use the JAG Mobile Solutions exclusive on board leveling system. Other unique trailer characteristics are solid not stubbed axles, conventional non-macerating toilets, truly shared air conditioning, and drastically improved egress makes this unit like no other. With overwhelming response from the attending public as well as prominent industry attendees it is possible that this offering may be the most dynamic change in ADA mobile compliance to hit the industry in years.

JAG Mobile Solutions is honored to be part of this wonderful charity event and would like to thank our participating customer partners, local well-wishers and our employees for making this event the most successful event to date.

JAG Mobile Solutions is constantly creating new and innovative mobile restrooms based on the unique needs of all customers. We look forward to provide and support our customers and community now and in the future.
