

# Solar Station

SERIES RESTROOM PLATFORM

***Exceeding Expectations***

***The Solar Station by JAG Mobile Solutions was developed to provide an advanced, self contained, sanitary solution in limitless environments. With the help of a solar panel and battery pack, the Solar Station provides a proper restroom experience, anywhere. It offers lighting, ventilation, flushing toilet, and a sink with running water – all either connected to power and water OR completely free from a water and power supply.***

The **Solar Station** is available in all of the JAG interior packages, including Cottage Series, Commercial, Industrial, VERSA, and Regal; and is also available in an endless array of exterior colors. The Solar Station is also available on a lowering trailer that delivers it to, and places it at your event. Need more than one **Solar Station**? The **Solar Station** is capable of linking with other **Solar Stations** to combine waste capacity, fresh water capacity, and shared solar power.
